What is Value Management

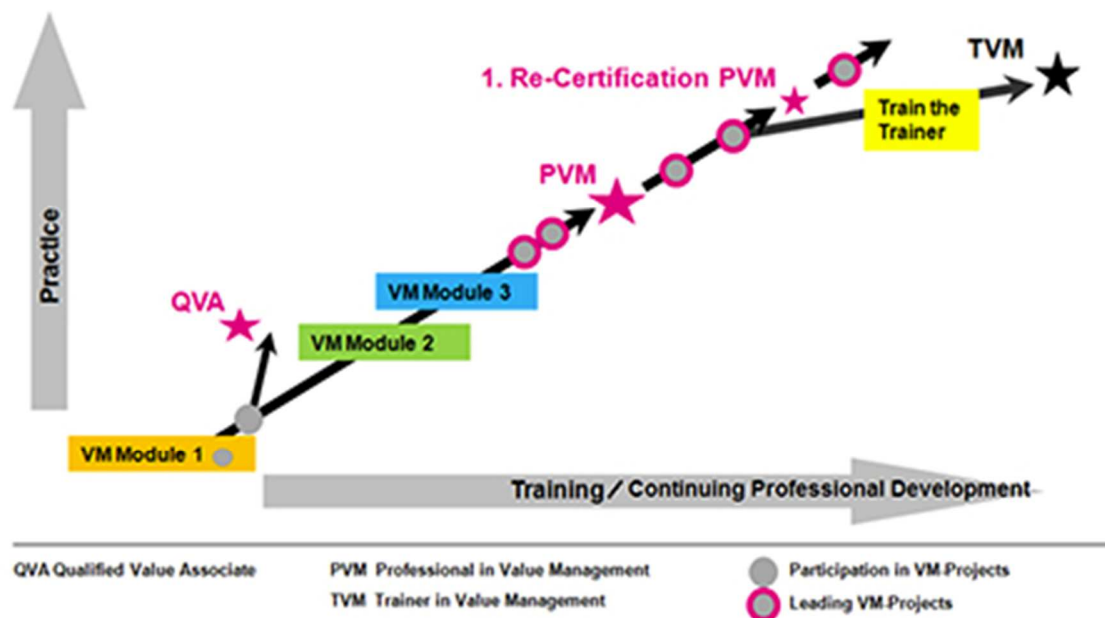

Value Management (VM), also known as Value Engineering (VE), is a creative team based framework that efficiently investigates ways to improve value in products, services, projects and organisations. VM / VE helps achieve an optimum balance between function, performance, quality, safety and cost. The proper balance results in optimum value.

Key features of VM / VE are:

- Widely used throughout industry, public and not-for-profit sectors
- Features organised facilitated team working and innovation
- Return on Investment of typically between 10:1 & 100:1 or more
- Globally recognized profession

Since the early days, VM / VE has evolved into a professional discipline with its own institutions (the Institute of Value Management in the UK) and Europe-wide qualifications known as the Professional in Value Management (PVM) and certified Trainer in Value Management (TVM).

Value for Europe

Training courses and certifications of the European Value Management Training & Certification System

VM / VE Training Programme Structure

The training of VM / VE practitioners consists of three 3-Day courses:

- VM1: Foundation Course in Value Management (see Page 4)
- VM2: Advanced 1 Course in Value Management (see Page 5)
- VM3: Advanced 2 Course in Value Management (see Page 6)

We are practicing value practitioners and facilitators and use the techniques and frameworks covered on the course in our everyday client work. This means that they are tried and tested and that we have many 'real world' examples to share with delegates.

Course Dates & Fees

We run this programme in March, June and November. Visit our web site at www.amskills.com for a full list of dates. Each of these 3-Day courses costs £1,600 + VAT per participant. We can also run in-house courses. Please contact Laura Robertson (details below) for more information.

Programme Director / Lead Tutor

Our VM / VE courses are led by Mark Law, a Chartered Engineer and seasoned professional VM / VE facilitator who works across the private, public and not-for-profit sectors. You can view Mark's professional profile and testimonials for his work at: <http://uk.linkedin.com/in/marklaw>
